

Hotel & Accommodation Providers Case Study & Success Stories

Headline: Pure World has a proven track record of working with many of the large multi site Hotel chains & Accommodation providers delivering significant Energy & Water savings over several years.

Challenges: Hotels typically have long operational hours and high occupancy levels. The sites have substantial back of house plant that is often left operational 24 hours per day without any way of controlling it. Energy & Water costs are high as are the client's expectations. The aim of any good energy reduction strategy is to match energy usage to property usage.

Opportunity: To provide bespoke Energy saving solutions per site created from a robust business case utilising energy and water saving technologies & controls backed up by guaranteed savings delivering exceptional ROI's. All savings are verified using actual data from revenue meters. All savings are obtained without affecting the client experience.

Success Stories

- Large hotel chain saved over 5% Energy savings and 20% Water savings across more than 100 sites returning their investment in under 6 months.
- National Rollout of an Energy Pack & a Water Pack solution provided our client with a saving of 15% off Energy Bills and 12% off water bills across more than 130 sites. The Rollout was completed in less than 12 months.

Testimonial: Accor have been working with Pure World for the past 3 years and have been impressed with their innovative approach to water, Energy and ultimately carbon reductions within our Hotels. I would have no hesitation to recommend their services to other companies within the hotel and leisure Industry- *Technical Services Director*
